Composite Course Schedule 2018

We provide the most comprehensive range of composite training courses available. Delegates regularly attend our courses from all industry sectors worldwide which are suitable for individuals and small companies through to tier one suppliers and OEMs.

We are continually involved in training industry personnel for the next generation of composite parts. Our courses are recognised as demanding, rewarding and representative of current best practice and processes and are continually updated. Our tutors are industry experts and our facilities set the standards for best practice and are specifically designed for delivery of composite training courses.

Course Code	Title	Price per Delegate (incl. 20% UK VAT)	Course Dates
DMSC39	Use of DMC Composite Repair Equipment	£996.00 (3 day course)	26-28 Mar 2018
DMSC50	Introduction to Composite Materials & Processes	£1,380.00	22-26 Jan 2018 10-14 Sep 2018
DMSC51	Wet Lay-Up Laminating	£1,380.00	14-18 May 2018
DMSC52	Spray Lay-Up Laminating	£1,380.00	21-25 May 2018
DMSC53	Resin Infusion Laminating & Light RTM	£1,380.00	16-20 Apr 2018 3-7 Dec 2018
DMSC54	Pre-Preg Laminating – Stage 1	£1,380.00	12-16 Feb 2018 25-29 Jun 2018 5-9 Nov 2018
DMSC55	Pre-Preg Laminating – Stage 2	£1,380.00	2-6 Jul 2018 12-16 Nov 2018
DMSC56	Pre-Preg Mould Making	£1,620.00	14-18 May 2018 19-23 Nov 2018
DMSC57	Trimming, Finishing & Assembly of Composites	£1,620.00	23-27 Apr 2018
DMSC58	Composite Repair – Stage 1	£1,620.00	12–16 Mar 2018 8-12 Oct 2018
DMSC59	Composite Repair – Stage 2	£1,620.00	19-23 Mar 2018 15-19 Oct 2018
DMSC60	Producing Your Own Composite Parts	£1,380.00	5-9 Feb 2018 11-15 Jun 2018
DMSC61	Composites for Engineers & Designers Stage 1 - Materials & Processes	£1,380.00	19-23 Feb 2018 4-8 Jun 2018 17-21 Sep 2018
DMSC62	Composites for Engineers & Designers Stage 2 - Advanced Design	£1,380.00	26 Feb - 2 Mar 2018 24-28 Sep 2018

Price Change

We have been able to maintain our course prices at the same level between 2013 and 2017. Unfortunately due to increasing costs, course bookings made after 31st January 2018 shall be subject to our new 2018 prices as follows:

Course price of £900.00 will increase to £996.00 from 1st January 2018 (incl. 20% UK VAT)

Course price of £1,260 will increase to £1,380.00 from 1st January 2018 (incl. 20% UK VAT)

Course price of £1,500 will increase to £1,620.00 from 1st January 2018 (incl. 20% UK VAT)

Bespoke Training Courses

If you cannot find a course to suit your needs, bespoke courses can also be provided for individuals through to full company training programmes, worldwide at the customers' own facilities or at our premises. Pricing is dependent on location, delegates and course content. Please contact us to discuss your needs.

dark matter composites ltd

Composite Course Information

Entry Requirements

No qualifications or previous experience is required unless otherwise stated on the specific course information sheet. If you are unsure please contact us.

Enrolments

- Enrolments are taken on a first come, first served basis. We require either an on-line booking or a completed enrolment form and full payment.
- On receipt of your booking/enrolment form, we will process your payment if there are places available on the course and issue a full course confirmation.
- If the course is full, your payment will not be processed and you will be advised accordingly.
- Please note that we do not take provisional bookings or hold any places. Course confirmations are only sent if places are available and full payment has been received into our account.

Payment

We accept the following forms of payment and can provide companies with pro-forma invoices where required:

- Credit and Debit cards including Mastercard, Visa, Maestro, Solo and American Express
- Personal or Company cheques payable to 'Dark Matter Composites Ltd'
- Paypal
- BACS, CHAPS or IBAN bank transfers

Course Fees

- The fees are stated on the individual course information sheets and are per delegate per course.
- Course fees stated are in pounds sterling and are subject to UK VAT at the current rate (20%).
- EU companies can reclaim VAT through their local VAT system. Non EU delegates cannot reclaim the VAT as the course is a service provided in the UK and not an exported product.
- The fees stated are valid until 31st December 2017.
- All fees stated include: provision of all materials, tools, equipment and protective clothing (except footwear, see below); lunch, tea & coffee for each day of the course; and course handouts.
- All course fees must be paid prior to the start of the course.
- Items produced by delegates can be taken away at the end of the course.

Location

Our courses are run at our dedicated training facilities in Redbourn, Hertfordshire, United Kingdom. We are close to London with good travel links to Central London and all London Airports, with London Luton Airport just 8 miles away. There are good transport links to the M1/M25 motorways and train links at the local towns of Hemel Hempstead, St Albans, Harpenden and Luton.

Times & Attendance

Each day starts promptly at 9am and finishes at approximately 6pm, Monday to Friday.

Clothing, tools and equipment

- Delegates must wear full-length trousers and closed leather shoes or safety boots (no trainers) during the course.
- All other tools, equipment and personal protective equipment are included in the course fee.

Course Assessment

Assessment activities are built into our courses, to give feedback on the achievement and potential of delegates. Delegates are assessed on their attendance, quality of practical work completed and a written test. Assessment marks are printed on the course certificates and kept on record.

Exclusions

Travel, accommodation and general sustenance expenses incurred by delegates are excluded from the course prices (except where otherwise stated).

Accommodation

Please note that we have an accommodation list that is available on our website or upon request.

dark matter composites ltd

Course Title: Use of DMC Composite Repair Equipment

Course Code: DMSC39 (3 day course)

Course Fees: £830.00 course fee plus £166.00 UK VAT (£996.00 per delegate)

Structure: 30% theory, 70% practical, 8 delegates maximum, no experience required

Summary

This three day course provides full technical training on how to set-up and use both our 'Step Sanding Tool Kit' and 'Small Step Sanding Tool Kit' most effectively. Delegates learn how to set up the routers and jigs to prepare consistent step sanded repair surfaces, in reduced time compared to standard tools. Delegates also prepare repair materials using the jigs and apply repairs using temporary tooling to demonstrate the overall effectiveness of the kit.

This course is suitable for delegates who intend to use or evaluate our tool kits and get the best from the equipment; including repair technicians, supervisors, engineers, designers, researchers and managers.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Day 1	<u>Introduction</u> <u>Theory</u> Introduction to the Step Sanding Tool Kits, on-tool extraction & mobile dust extraction units	<u>Theory, Demo & Practical</u> Using the tool kit to identify ply layers in damaged composite parts, including material, orientation, ply thickness & depth	<u>Theory, Demo & Practical</u> Setting up and using the small diameter circular jig Routing out a small diameter step sanded repair surface and core materials	
Day 2	<u>Theory, Demo & Practical</u> Setting up and using the radius arm jigs Routing out a larger step sanded repair surface using the radius arm jigs and small circular jigs		<u>Theory, Demo & Practical</u> Setting up and using the Small Step Sanding Tool Kit with the thin flexible radius arm and flexible small circle jigs Routing out a step sanded repair surface on a part with changing double curvature	
Day 3	<u>Theory, Demo & Practical</u> Using the jigs to prepare repair materials and repair patches Pressure de-dulk of repair patches	<u>Theory, Demo & Practical</u> Using temporary repair tooling Applying repair patch to the prepared repair surface Vacuum bagging of repairs	<u>Practical</u> Curing of the completed repairs <u>Theory & Practical</u> Using the jigs to prepare non-circular repair surfaces	<u>Practical & Discussion</u> Evaluation of the repairs completed Delegate questions and answers

If you are looking to for more comprehensive composite repair courses, our 5 day courses 'DMSC58, Composite Repair Stage 1' and 'DMSC59, Composite Repair Stage 2' provide the foundation used across industry sectors.

dark matter composites ltd

Course Title: Introduction to Composite Materials & Processes

Course Code: DMSC50

Course Fees: £1,150.00 course fee plus £230.00 UK VAT (£1,380.00 per delegate)

Structure: 30% theory, 70% practical, 12 delegates maximum, no experience required

Summary

This course provides a good overview of composites in terms of materials, processes, typical applications, advantages/disadvantages and limitations.

The course is suitable for support staff who need an awareness of composites and understanding of terminology used, typically quality, sales, purchasing, HR and administration roles as well as 1st year apprentices.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Monday	<u>Introduction</u> <u>Equipment issue</u> <u>Health & Safety</u> <u>Theory</u> Composites history Composites theory	<u>Theory</u> Matrix materials Reinforcing materials Fabric types Laminate theory Process overview	<u>Theory</u> Wet lay-up laminating overview & simple resin calculations <u>Demo & Practical</u> Wet lay-up laminating of a mould including material preparation and dispensing, gel coating, wetting out & consolidation using brush application	
Tuesday	<u>Practical</u> Completion of wet lay-up mould lamination using roller application	<u>Theory</u> Pre-preg laminating overview <u>Theory, Demo & Practical</u> Pre-preg templating & material preparation	<u>Demo & Practical</u> Laminate first skins of the pre-preg part Vacuum de-bulk	<u>Theory</u> Sandwich panel theory Core materials <u>Demo & Practical</u> Prepare core for pre-preg part
Wednesday	<u>Practical</u> Laminate core & closing skins of pre-preg part	<u>Theory</u> Vacuum bagging materials & methods <u>Demo & Practical</u> Vacuum bagging of pre-preg part	<u>Theory & Practical</u> Matrix curing & post-curing Cure pre-preg part <u>Theory & Demos</u> Trimming, finishing & inspection of composites	<u>Demo & Practical</u> Breakout wet lay-up mould tool Trim & finish mould ready for use Post-cure mould

Course Title: Wet Lay-Up Laminating

Course Code: DMSC51

Course Fees: £1,150.00 course fee plus £230.00 UK VAT (£1,380.00 per delegate)

Structure: 30% theory, 70% practical, 12 delegates maximum, no experience required

Summary

Wet lay-up is the most widely used laminating process. We use a structured approach to train delegates to produce quality parts consistently. Using controlled processing, delegates reduce wastage and generated fumes to comply with new emissions laws. Working with a large range of materials, tools and laminating techniques, delegates will gain a level of practical competence during the course.

This course is suitable for the full training of wet lay-up laminators, as well as engineers who need a complete understanding of the process and design aspects of this laminating technique.

Course Title: Spray Lay-Up Laminating

Course Code: DMSC52

Course Fees: £1,150.00 course fee plus £230.00 UK VAT (£1,380.00 per delegate)

Structure: 25% theory, 75% practical, 8 delegates maximum, no experience required

Summary

Spray lay-up is a process that is suited to medium to large mouldings. It is a relatively simple process that is highly dependent on operator skill in setting up and using the specialised spray equipment, in the proper manner, to obtain consistent results.

This course is suitable for the training of spray lay up laminators, as well as engineers who need a complete understanding of the process and design aspects of this laminating technique.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Monday	<u>Introduction</u> <u>Equipment issue</u> <u>Health & Safety</u> <u>Theory</u> Introduction to composites theory, matrix, reinforcing & fabric materials	<u>Theory</u> Wet lay-up & spray lay-up processes Lay-up specifications <u>Theory, Demo & Practical</u> Tooling care, preparation & release agents	<u>Theory, Demo & Practical</u> Set up, use and cleaning of gel coat gun Controlling styrene emissions Spray patterns & gun/body articulation Polyester gel coat application to concave & convex shapes, controlling & checking coating thickness	
Tuesday	<u>Theory & Demo</u> Storing, handling & preparation of gel coats, pigments, accelerators & catalysts Exotherm and controlling risk <u>Theory, Demo & Practical</u> Set up, use and cleaning of chopper gun Developing spray patterns, correlating resin/fibre delivery, roving entry and distribution into the resin stream		<u>Demo & Practical</u> Spray lay-up of concave & convex shapes, application & brush/roller consolidating using polyester resins Spray patterns, overlaps, gun & body articulation Controlling & checking coating thickness	
Wednesday	<u>Theory, Demo & Practical</u> Use and fitting of masks and containment flanges	<u>Demo & Practical</u> Brush application of gel coats & tissue plies	<u>Demo & Practical</u> Preparation & spray lay-up of male tool, including external, acute & radius corners, horizontal, vertical & angular surfaces and green trimming using epoxy resins

dark matter composites ltd

Course Title: Resin Infusion Laminating & Light RTM

Course Code: DMSC53

Course Fees: £1,150.00 course fee plus £230.00 UK VAT (£1,380.00 per delegate)

Structure: 35% theory, 65% practical, 12 delegates maximum, no experience required

Summary

Resin infusion laminating and light resin transfer moulding are covered in a single course due to the similar nature of the processes yet distinctive merits. This course covers a full range of materials and processing techniques, giving an in-depth and hands on approach to understanding how the processes work and how they can be applied successfully.

This course is suitable for lead technicians, supervisors, engineers, designers and researchers who are responsible for trials, development and tooling design associated with these processes.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Monday	<u>Introduction</u> <u>Equipment issue</u> <u>Health & Safety</u> <u>Theory</u> Introduction to composites theory, matrix, reinforcing & fabric materials	<u>Theory & Discussion</u> Resin flow infusion Darcy's Law and effects of permeability, flow channels, pressure dams, vacuum, temperature & viscosity External distribution & infusion media & flow fronts	<u>Theory, Demo & Practical</u> Setting up & completing trial panels Resin calculations Vacuum bagging Vacuum bag materials & methods Leak detection & vacuum volume	<u>Demo & Practical</u> Resin flow infusion trial panels using a range of laminate combinations, core materials, external distribution & infusion media <u>Theory & Discussion</u> Sandwich panels Infusion core materials
Tuesday	<u>Practical</u> Infuse sandwich trial panels <u>Theory & Practical</u> Using trial panel information Designing infusion layout for parts	<u>Theory, Demo & Practical</u> Tooling care, preparation & release agents <u>Practical</u> Lay-up a resin flow infusion part into a complex female tool including gel coat application, fabrics, core material, external distribution & infusion media, surface bagging & leak checking		<u>Discussion & Practical</u> Resin calculations for parts Predicting flow fronts & infusion times Final resin flow infusions of parts with external media
Wednesday	<u>Theory</u> Internal infusion media and light resin transfer moulding (Light RTM) Reinforcing fabrics & core materials	<u>Practical</u> Resin flow infusions with a range of internal media, reusable silicon vacuum bags & semi-rigid closed moulds	<u>Theory</u> Reusable silicon vacuum bags Semi-rigid closed moulds Creating seals, connections and resin channels	<u>Theory, Demo & Practical</u> Design of mould seals, injection & vent points Application of calibration wax, injection & vent point connections & profiles
Thursday	<u>Theory, Demo & Practical</u> Resin film infusion Material life, storing, defrosting, handling, templating & application	<u>Practical</u> Use resin film laminating to produce a semi-rigid closed mould to be used for producing light RTM parts		<u>Demos & Practical</u> Envelope vacuum bagging <u>Theory & Practical</u> Curing resin films Temperature profiles
Friday	<u>Demo & Practical</u> Break out and prepare semi-rigid closed moulds for use	<u>Guided Practical</u> Apply gel coat and apply reinforcement materials Prepare & use Light RTM equipment to produce parts	<u>Practical</u> Break out parts <u>Theory & Discussion</u> Infusion causes of & identifying defects & relate to parts produced	<u>Reinstate Workshop</u> <u>Written test</u> <u>Equipment return</u> <u>Summary / Feedback</u>

dark matter composites ltd

Course Title: Pre-Preg Laminating – Stage 1

Course Code: DMSC54

Course Fees: £1,150.00 course fee plus £230.00 UK VAT (£1,380.00 per delegate)

Structure: 35% theory, 65% practical, 12 delegates maximum, no experience required

Summary

This course follows the complex production processes associated with using pre-preg materials, by breaking them down into simple progressive steps. It covers a wide range of materials, processing methods and application techniques applied solely to pre-preg laminates. This is considered the foundation course for a number of high end industry sectors using these materials, including Formula 1 and OEM/Tier 1 Aerospace.

This course is suitable for anyone involved with processing pre-preg materials, including pre-preg laminators, technicians, supervisors, engineers, designers, researchers and managers.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00

dark matter composites ltd

Course Title: Pre-Preg Laminating – Stage 2

Course Code: DMSC55

Course Fees: £1,150.00 course fee plus £230.00 UK VAT (£1,380.00 per delegate)

Structure: 25% theory, 75% practical, 12 delegates maximum

Pre-requisite: Prior completion of course DMSC54, Pre-preg Laminating – Stage 1

Summary

This is a progression course and follows the full range of single and multi-stage techniques associated with using a range of core materials to produce sandwich structures with pre-preg materials.

This course is suitable for anyone involved with processing pre-preg materials, including pre-preg laminators, technicians, supervisors, engineers, designers, researchers and managers.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Monday	<u>Introduction</u> <u>Equipment issue</u> <u>Theory & Demos</u> Refresh of composite theory & materials Sandwich panel theory Core materials	<u>Theory</u> Adhesive Bonding Peel plies Two/double stage processing <u>Practical</u> Laminate first skin, for 2 stage lay-up including peel ply, vacuum bagging & curing	<u>Theory & Demo</u> One/single stage processing Preparation of nomex & aluminium honeycomb core materials Resin film application Core splicing	<u>Practical</u> Laminate one/single stage core lay-up on curved tool, including honeycomb materials, de-bulking, core splicing, vacuum bagging & curing
Tuesday	<u>Theory, Demo & Practical</u> Processing foam and syntactic core materials Thermoforming foam <u>Demo & Practical</u> De-bag & preparation of first skin	<u>Practical</u> Preparation and fitment of honeycomb, foam, syntactic core and core splicing over internal, external, acute & radius corners	<u>Theory & Demo</u> Caul plates with core processing <u>Practical</u> Processing hard pads & inserts into sandwich panels	<u>Practical</u> Laminating of closing skins for two/double stage lay-up Vacuum bag & cure
Wednesday	<u>Theory</u> Three/triple stage processing <u>Practical</u> Laminate, vacuum bag & cure outer skin for three/triple stage lay-up	<u>Theory & Demo</u> Inserts, hard pads with core processing <u>Practical</u> Laminate, vacuum bag & cure inner skin for three/triple stage lay-up	<u>Practical</u> Prepare outer & inner skins, laminate resin film, fit & splice core, fit and pot inserts for a closed mould three/triple stage lay-up Vacuum bag and autoclave cure for closed mould three/triple stage lay-up	
Thursday	<u>Demo & Practical</u> De-bag & de-mould all parts produced <u>Theory & Discussion</u> Process control & inspection	<u>Theory & Discussion</u> Causes of & identifying defects Inspection of parts produced	<u>Assessed Practical</u> Laminate complete part including material preparation, multi-stage laminating and processing, split tooling, inserts, various core materials & vacuum de-bulking	
Friday	<u>Assessed Practical</u> Complete assessed practical, vacuum bagging, autoclave loading & curing		<u>Practical</u> De-bag & de-mould assessment part Safe edge all parts produced	<u>Reinstate Workshop</u> <u>Written test</u> <u>Equipment return</u> <u>Summary / Feedback</u>

Course Title: Pre-Preg Mould Making

Course Code: DMSC56

Course Fees: £1,350.00 course fee plus £270.00 UK VAT (£1,620.00 per delegate)

Structure: 30% theory, 70% practical, 12 delegates maximum, no experience required

Summary

The course provides comprehensive training, understanding and application of low temperature pre-preg materials to produce composite tooling. Emphasis is on producing mould tools with complex geometry that are self supporting with no distortion.

This course is suitable for anyone involved with processing pre-preg moulds, including pre-preg laminators, technicians, supervisors, engineers & designers.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00

dark matter composites ltd

Course Title: Trimming, Finishing & Assembly of Composites

Course Code: DMSC57

Course Fees: £1,350.00 course fee plus £270.00 UK VAT (£1,620.00 per delegate)

Structure: 30% theory, 70% practical, 12 delegates maximum, no experience required

Summary

This course provides comprehensive training, understanding and application of a full range of trimming, finishing and assembly techniques associated with composite parts. Emphasis is on the safe and effective use of a range of hand, power and bench tools applied to composite materials. As there are no speeds or feeds tables for composite materials, the course includes selection and use of the right abrasive or cutting head for the right materials to give the best results.

This course is suitable for anyone involved with trimming, finishing and assembly of composite parts, including technicians, supervisors, CNC operators, engineers, designers, researchers and managers.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Monday	<u>Introduction</u> <u>Equipment issue</u> <u>Health & Safety</u> <u>Theory</u> Introduction to composites theory, materials & processes	<u>Theory</u> Types, uses & control of engineering sketches & drawings <u>Practical</u> Interpreting & extracting information from engineering sketches & drawings	<u>Theory & Demos</u> Identifying materials and processes used for composite parts Safe handling of unfinished parts <u>Theory & Demos</u> Measuring & marking out composite parts	<u>Practical</u> Measure & mark a range of features on a range of composite parts/materials using surface tables, height gauges, scribes, rules & jigs
Tuesday	<u>Theory & Demo</u> Trimming, sanding & finishing overview Cutting & abrasive materials & grades Planning operation sequences	<u>Theory & Demo</u> Safe use of air and electrical power tools Dust generation, control & extraction Defects caused by trimming activities	<u>Theory & Demos</u> Edge damage and de-lamination Setting up & safe use of band saws, disc cutters, routers and saws <u>Practical</u> Cut a range of profiles in a range of composite parts/materials using a range of tools and jigs	
Wednesday	<u>Theory & Demos</u> Filing & sanding composite materials Edge & surface finishing Setting up & safe use of finishers, disc sanders, die grinders, belt sanders & orbital sanders <u>Practical</u> Final shaping and surface finishing of a range of features in a range of composite materials using range of tools and jigs		<u>Theory & Demos</u> Drilling & boring composite materials Break through, laminate support and back drilling Setting up & safe use of pedestal drills, low speed and high speed hand drills <u>Practical</u> Drill & bore a range of hole features in a range of composite parts/materials including small/large holes, counter sinks, counter bores, inserts, carbide & diamond tips & drill jigs	
Thursday	<u>Theory, Demos & Practical</u> Cleaning & polishing composite materials using compounds, abrasives & polishers	<u>Theory, Demos & Practical</u> Composite assemblies Adhesive bonding Surface preparation Peel plies Adhesive application & curing		<u>Discussion & Practical</u> Inspection, evaluation and review of all activities completed Assessment briefing
Friday	<u>Assessed Practical</u> Fully trim, drill, finish and assemble a range of test components accurately to drawings Including planning operations, selection of correct tools, cutting heads & abrasives, effective techniques & final assembly of the parts			<u>Reinstate Workshop</u> <u>Written test</u> <u>Equipment return</u> <u>Summary / Feedback</u>

Course Title: Composite Repair – Stage 1

Course Code: DMSC58

Course Fees: £1,350.00 course fee plus £270.00 UK VAT (£1,620.00 per delegate)

Structure: 30% theory, 70% practical, 12 delegates maximum, no experience required

Summary

This course provides comprehensive training, understanding and hands on application of a full range of repair techniques to composite mouldings, from cosmetic through to structural repairs. Emphasis is on understanding failure modes, recognising materials and production process, and correct use of tools, abrasives and dust extraction in order to apply effective repairs.

This course is suitable for anyone involved with repairs to composite materials, including repair technicians, supervisors, engineers, designers, researchers and managers.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Monday	<u>Introduction</u> <u>Equipment issue</u> <u>Health & Safety</u> <u>Theory</u> Introduction to composites theory, materials & processes	<u>Theory & Discussion</u> Damage detection Repair of composites overview <u>Theory, Discussion & Demo</u> Dust generation, risk assessment & capture	<u>Theory & Discussion</u> Material removal tools & abrasives <u>Theory, Demo & Practical</u> Non-structural cosmetic & temporary repairs	<u>Theory, Demo & Practical</u> Wet lay-up laminating Matrix preparation, application, curing & exotherm control Application of cosmetic gel coat repairs Application of temporary repairs
Tuesday	<u>Demo & Practical</u> Sanding and polishing of cosmetic gel coat repairs Re-filling of cosmetic gel coat repairs Assessment of temporary repairs	<u>Theory, Practical & Discussion</u> Failures modes & predicting failure Impacts & assessment of damage <u>Theory</u> Minor and major structural laminate repairs	<u>Demo & Practical</u> Removal of temporary repair Preparation of tapered/scarf surfaces Preparation of single & double sided repair surfaces	<u>Theory, Demo & Practical</u> Temporary backing structures Process & material matching & preparation
Wednesday	<u>Theory, Demo & Practical</u> Wet lay-up laminating of single & double sided, minor & major structural repairs	<u>Theory & Demo</u> Structural sandwich panel repairs Core preparation & splicing <u>Practical</u> Preparation of type A, B & C structural sandwich panel repair surfaces & materials for infused & pre-preg panels		<u>Theory & Demo</u> Vacuum bagging & materials Caul plates <u>Demo & Practical</u> Wet lay-up & vacuum bagging of type A/B structural repairs
Thursday	<u>Demo & Practical</u> Recognition & orientation of pre-preg materials Laminating of type B/C structural pre-preg sandwich panel repairs	<u>Theory & Practical</u> Curing pre-preg repairs Temperature & pressure profiles Tg points Use of hot bonder for curing pre-preg repairs	<u>Discussion & Practical</u> Inspection, evaluation and review of repairs completed Destructive testing of repairs	<u>Assessed Practical</u> Assessment of damage Complete a repair strategy Preparation of repairs
Friday	<u>Assessed Practical</u> Completion of repairs to a range of test piece components, including step sanded surface preparation, identification of laminate plies, preparation & application of orientated materials, vacuum bagging, curing, surface finishing, blending and polishing			<u>Reinstate Workshop</u> <u>Written test</u> <u>Equipment return</u> <u>Summary / Feedback</u>

dark matter composites ltd

Course Title:	Composite Repair – Stage 2
Course Code:	DMSC59
Course Fees:	£1,350.00 course fee plus £270.00 UK VAT (£1,620.00 per delegate)
Structure:	25% theory, 75% practical, 12 delegates maximum
Pre-requisite:	Prior completion of course DMSC58 (previously DMSC59, Repair of Composites)

Summary

This progression course addresses more advanced composite repair techniques and issues in respect to more extensive and complex structural repairs. Repairs are conducted on solid laminates and sandwich panels using temporary repair tooling, step sanding routers and jigs, standard repair patches and more extensive range of curing methods. Emphasis is on refinement of the repair techniques and working with on-tool dust extraction.

This course is suitable for anyone involved with repairs to composite materials, including repair technicians, supervisors, engineers, designers, researchers and managers.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Monday	<u>Introduction</u> <u>Equipment issue</u> <u>Theory & Discussion</u> Advanced composite repairs Co-bonding & secondary bonding structural repairs Structural repair design and processes	<u>Theory, Demo & Practical</u> Refresh of composite materials & processes On tool extraction, dust containment and capture strategies Advanced dust control & dust free material removal	<u>Theory, Demo & Practical</u> Pre-preg material life, storing & defrosting Ply orientation standards, notations & variations Spring back, distortion, balanced & un-balanced orientated plies Nesting & kitting	<u>Theory, Demo & Practical</u> Adhesion & release Release agents Adhesive Bonding Peel plies <u>Demo & Practical</u> Production of a pre-preg panel to production documentation
Tuesday	<u>Theory, Demo & Practical</u> Sandwich panels & multistage processing Core materials & tracer films Preparation & application of honeycomb core Second stage curing of pre-preg panel	<u>Theory & Discussion</u> Human Factors Damage inspection & evaluation Damage reporting Structural repair design considerations	<u>Theory, Demo & Practical</u> NDT inspection overview & techniques Setting up and using NDT equipment NDT inspection of undamaged parts	<u>Practical</u> NDT Inspection of damaged parts Production of inspection report Design of a standard step sanded repair scheme
Wednesday	<u>Theory, Demo & Practical</u> Conducting laminate discovery activities using 'Step Sanding Tool Kit' Plan repair activity Fibre, fabric, orientation & thickness records	<u>Theory, Demo & Practical</u> Prepare step sanded repair surface for type B wet lay-up part using Step Sanding Tool Kit		<u>Theory, Demo & Practical</u> Fibre to resin ratios Ply thickness calculations and variation De-bulk factors Bleed variation Calculation of bleed plies
Thursday	<u>Theory, Demo & Practical</u> Prepare and apply materials to the repair surface Wet lay-up laminate repair using double membrane vacuum bag with bleeder plies	<u>Theory, Demo & Practical</u> Tg point of parts Using infra-red lamps & temporary ovens for curing Positioning of thermocouples Recording of cure profile	<u>Theory, Demo & Practical</u> Producing and using standard repair patches Pressure de-bulk of repair patch	<u>Practical</u> Prepare step sanded repair surface for type A pre-preg part using Step Sanding Tool Kit
Friday	<u>Theory, Demo & Practical</u> Selection and sequence of vacuum bagging consumables <u>Practical</u> Apply standard repair patch & vacuum bag	<u>Theory, Demo & Practical</u> Using hot bonders & heat mats, for on part curing Positioning of thermocouples Determination & monitoring of cure profile	<u>Discussion & Practical</u> Inspection, evaluation and review of repairs completed Completion of repair reports Destructive testing and inspection of repairs completed	<u>Reinstate Workshop</u> <u>Written test</u> <u>Equipment return</u> <u>Summary / Feedback</u>

Course Title: Producing Your Own Composite Parts

Course Code: DMSC60

Course Fees: £1,150.00 course fee plus £230.00 UK VAT (£1,380.00 per delegate)

Structure: 25% theory, 75% practical, 8 delegates maximum, no experience required

Summary

This course covers producing a part from a sketch through to a pattern, mould and component using a range of cost effective methods and materials to achieve good results. It includes how to set up a basic workshop environment for composite processes and cost effective investment.

This course is suitable for enthusiasts and small companies who want to make their own composite parts, expanding delegates' knowledge through expert guidance.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Monday	<u>Introduction</u> <u>Equipment issue</u> <u>Health & Safety</u> <u>Theory</u> Introduction to composites theory, materials & processes	<u>Theory & Demos</u> Tooling and component design principles Pattern making & materials Mould making & materials Laminate features	<u>Demo & Practical</u> Production of a pattern using tooling board, including shaping, filling, surfacing, blocking up & final surface finishing using a range of bench tools and hand tools	
Tuesday	<u>Theory, Demo & Practical</u> Pattern preparation & release agents Surface seal & release patterns	<u>Theory & Demos</u> Wet lay-up laminating Wet lay-up calculations Material storage, dispensing, preparation & application Fume & exotherm control	<u>Practical</u> Wet lay-up laminating of a mould including material preparation, dispensing, gel coating, wetting out & consolidation of glass fibre chopped strand mat, brush & roller application methods	
Wednesday	<u>Theory, Demo & Practical</u> Resin infusion laminating Trial panels & evaluation Designing infusion layout for parts Resin calculations	<u>Practical</u> Laminating a part for resin flow infused part including gel coating, application of cosmetic carbon fabric & structural glass fabric, application of distribution & infusion media	<u>Theory, Demo & Practical</u> Vacuum bagging & materials Surface bagging of infusion parts Leak detection <u>Practical</u> Resin infusion of parts	<u>Demo & Practical</u> Break out wet lay-up moulds <u>Theory, Demo & Practical</u> Trimming & finishing composites Trim & post-cure wet lay-up moulds
Thursday	<u>Practical</u> Surface finish & release wet lay-up moulds for use <u>Theory</u> Pre-preg laminating	<u>Theory, Demo & Practical</u> Pre-preg life, storing, defrosting, templating, ply orientation, nesting & kitting	<u>Demo & Practical</u> Pre-preg application & laminating of first skins cosmetic skins of a carbon fibre part	<u>Theory, Demo & Practical</u> Sandwich structures Core materials Core preparation
Friday	<u>Practical</u> Laminate structural core & closing skins of a pre-preg part <u>Demo & Practical</u> Envelope vacuum bagging of pre-preg part	<u>Theory & Practical</u> Curing pre-preg parts Basic ovens <u>Practical</u> Trim & finish composite parts produced	<u>Practical & Discussion</u> Inspection of parts & identifying defects <u>Theory & Discussion</u> Delegate case studies & guidance	<u>Reinstate Workshop</u> <u>Written test</u> <u>Equipment return</u> <u>Summary / Feedback</u>

Course Title:	Composites for Engineers & Designers, Stage 1 - Materials & Processes
Course Code:	DMSC61
Course Fees:	£1,150.00 course fee plus £230.00 UK VAT (£1,380.00 per delegate)
Structure:	60% theory, 40% practical, 12 delegates maximum, no experience required
Pre-requisite:	This is a high end course and delegates will need to have a sound technical background in materials, engineering or design, or have relevant experience

Summary

This is our most intensive and in-depth course covering current composite materials and processes. It provides an insight into working with composite materials, their limitations and compromises. The sessions are informative, interactive and thought provoking, bridging the gap between practice and theory. The key focus is on component design principles, production considerations and controls, to form an intuitive and creative approach to composite engineering.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Monday	<u>Introduction</u> <u>Equipment issue</u> <u>Health & Safety</u> Measures & Legislation <u>Theory & Discussion</u> Composites history Composites theory	<u>Theory & Discussion</u> Matrix materials Reinforcing materials Fabric types Laminate theory and ply orientation Lay-up specifications	<u>Theory & Discussion</u> Sandwich structures Core materials Processing composite materials <u>Theory & Practical</u> Tooling care and preparation Release agents	<u>Theory & Guided Practical</u> Wet lay up laminating Design a laminate to suit a load requirement Production of a wet lay-up part including calculations, gel coat & laminate application
Tuesday	<u>Theory</u> Resin flow & film infusion laminating External & internal media with vacuum bagged & closed moulding <u>Demo & Practical</u> Trial panels & evaluation	<u>Theory & Discussion</u> Vacuum bagging Bagging materials & methods Leak detection <u>Guided Practical</u> Design of distribution media for resin flow infused part	<u>Guided Practical</u> Gel coating, application of fabrics, external distribution and infusion media, surface vacuum bagging and leak detection of resin flow infusion part	<u>Practical & Discussion</u> Resin calculations Predicting flow fronts & infusion times Final resin flow infusion and evaluation of parts <u>Demonstration</u> Resin film infusion laminating
Wednesday	<u>Theory, Demo & Guided Practical</u> Pre-preg laminating Material templating, ply orientation, nesting & kitting Design a laminate to suit a load requirement	<u>Theory</u> Processing & preparation of core materials <u>Guided Practical</u> Pre-preg laminating of part with sandwich structure	<u>Demo & Practical</u> Envelope vacuum bag & cure pre-preg part <u>Theory</u> Matrix curing & post-curing, temperature & pressure profiles Tg points	<u>Theory & Videos</u> Resin transfer moulding Hot press moulding Filament winding Pultrusion Automated tape laying & fibre placement
Thursday	<u>Theory & Discussion</u> Causes of and identifying defects Manual & NDT inspection Production & quality controls In-service monitoring	<u>Theory, Demos & Practical</u> Breakout parts produced Trimming & finishing composites	<u>Theory & discussion</u> Adhesion & bonding methods <u>Theory & Demos</u> Failure modes Re-work & repair principles Repair techniques	<u>Guided Practical</u> GRP and pre-preg repairs including removal of damage, preparation of the repair surface & laminating of repairs <u>Reinstate Workshop</u>
Friday	<u>Theory & Discussion</u> Tooling and component design principles, types materials & life Re-cycling & environmental issues	<u>Practical & Discussion</u> Case studies for tooling and component designs & problem solving	<u>Theory & Discussion</u> Laminate calculations Finite element analysis Testing composites On-line resources	<u>Written test (1hour)</u> <u>Equipment return</u> <u>Summary / Feedback</u>

Course Title: Composites for Engineers & Designers, Stage 2 - Advanced Design

Course Code: DMSC62

Course Fees: £1,150.00 course fee plus £230.00 UK VAT (£1,380.00 per delegate)

Structure: 25% theory, 75% practical, 12 delegates maximum

Pre-requisite: Prior completion of DMSC61

Summary

This course picks up from where our stage 1 engineers and designers course ended. We address the intricate detailing of both laminate and tooling design through a structured problem solving approach discussing real problems and possible solutions. The course is a bridge between production and design to aid communication between departments. It was originally designed to support training for CAE tools such as Fibresim, as many companies and personnel had access to the tools but did not use them effectively.

Course Content

	09:00 – 11:00	11:15 – 13:15	13:45 – 15:45	16:00 – 18:00
Monday	<u>Introduction</u> <u>Equipment issue</u> <u>Theory & Demos</u> Refresh of composite theory, pre-preg materials & processes	<u>Theory & Discussion</u> Orientation standards, part & mould side definitions & handing issues Balanced & unbalanced laminates Distortion & springback	<u>Practical & Discussion</u> Design a range of laminates using various materials to address balanced, unbalanced, semi-isotropic, distorted, undistorted, springback & handed issues	<u>Guided Practical</u> Laminate materials to the designs completed Identify further problems due to material application Vacuum bag & cure parts
Tuesday	<u>Theory & Discussion</u> Ply datums & placement Draping, distortion, deviation & sequences Joins, splices, darts, discontinuities & sequences Production of lay-up manuals	<u>Practical</u> Design of laminates over a range of shapes/features to address datums, placement, draping, distortion, deviation, joins, darts, discontinuities, & laminate sequence issues	<u>Discussion</u> Review of laminate designs and potential issues <u>Practical</u> Prepare material plies to the laminate designs completed	<u>Guided Practical</u> Laminate materials to the designs completed Identify, record & solve problems encountered due to material application Vacuum bag & cure parts
Wednesday	<u>Theory & Discussion</u> Metal verses composite tooling & thermal expansion issues Tooling & component features & design principles Tiled and templated laminating methods for composite tooling	<u>Demo & Practical</u> Preparation of patterns including fitting split/joint boards, shaped locators & releasing Lamination of a mould tool using tiled, orientated and balanced plies and vacuum de-bulks	<u>Practical</u> Design of a range of composite mould tooling over a range of shapes/features to address both laminate and production process requirements	<u>Discussion</u> Review of mould tooling designs in relation to laminate and production requirements and potential issues
Thursday	<u>Theory & Discussion</u> Structural laminate & ply loading requirements Consideration shape, joins, inserts and fixings	<u>Practical</u> Complete simple indicative calculations to establish initial processes, materials, insert design and structural laminate requirements	<u>Discussion</u> Review of calculations completed and initial laminate designs and potential issues	<u>Practical</u> Design of mould split lines, laminate & ply sequence to meet structural requirements Compilation of lay-up manual to produce the structural parts
Friday	<u>Discussion</u> Review of designs to meet structural requirements and potential issues	<u>Guided Practical</u> Full material preparation & application for structural parts, vacuum bag & cure as required Modification of lay-up manual as required	<u>Practical & Discussion</u> Breakout all parts made Full review of all parts made, identifying unexpected issues and solutions	<u>Written Test</u> <u>Reinstate Workshop</u> <u>Equipment return</u> <u>Summary / Feedback</u>

COURSE ENROLMENT FORM

Please complete the form in BLOCK letters

Course Code	Course Title	Course Date	Course Fee
Where did you find out about the course?			

Personal Details

Title	First Name	Surname	Date of Birth
Address			
Postcode			
Telephone No.	Mobile No.	Email	
Do you have any special dietary requirements or special needs? If 'Yes' please give details:			Yes / No

Employer or Emergency Contact Details

Company and/or Contact Name	Telephone No.
Address	
Postcode	

I confirm that I agree to the 'Course Enrolment Conditions' and that the information given above is correct. For applicants under 18 years old at the start of the course, I also confirm that I am a parent/legal guardian/employer (please delete as appropriate) of the applicant and give my consent for them to attend the course.

Name.....Signature.....Date.....

Payment

- Personal/Company cheque enclosed, payable to 'Dark Matter Composites Ltd'
- UK Bank Transfer (payment details shall be provided upon enrolment receipt)
- International Bank Transfer (payment details shall be provided upon enrolment receipt)
- Paypal (we will send out a payment request on receipt of this application)
- Credit Card

Card Type	MasterCard / Visa / Maestro (Switch) / Visa Electron / Solo / American Express													
Card Number														
Start Date						Expiry Date								
Security Number						Issue Number (switch only)

Course Enrolment Conditions

1. These Course Enrolment Conditions apply to all training services provided by Dark Matter Composites Ltd (DMC). Customer's Terms & Conditions or deviations from these are not applicable unless agreed in writing.
2. It is the customers' responsibility to check that the course is suitable for its delegate(s) training needs. We shall advise on course content and anticipated outcome as requested.
3. Enrolments are taken on a first come, first served basis and shall only be confirmed on receipt of completed enrolment forms and receipt of full payment.
4. For company and group bookings, an enrolment form must be completed for each delegate.
5. Courses will be confirmed as running as soon as sufficient applications are received and no later than 2 weeks prior to the course start date.
6. All course fees are per delegate per course and include: provision of all materials, tools and protective clothing (except footwear, see below); lunch, tea & coffee for each day of the course; and course handouts.
7. Payment of course fees are due prior to the course start date. Prices stated are in pounds sterling.
8. Travel, accommodation and general sustenance expenses incurred by delegates are excluded from the course fees (except where otherwise stated).
9. Cancellations by delegates prior to the course will be refunded on the following basis: 14 calendar days or more 80%; less than 14 calendar days no refund. If a cancellation is unavoidable by DMC, an alternative date or full refund will be given.
10. Transferral of bookings applies to a change in course or course date and must be completed 14 calendar days prior to the start of the original course booking. Each transferred booking, will be subject to an administration and materials charge equivalent to 20% of the course fee. A maximum of two booking transfers will be processed. Outside of these transfer terms, cancellation terms will apply.
11. Delegates must advise DMC of any dietary requirements or special needs on enrolment.
12. The outcome and achievement of delegates is based upon the ability and attendance of the individual delegates.
13. DMC shall not be liable for any kind of damage arising directly or indirectly out of or in connection with the performance or non-performance of the training, unless such damages are caused by the gross negligence or intent of DMC or its employees.
14. Delegates attending DMC courses must comply with safety procedures covered at the start of and during each course. DMC seeks to achieve the highest standards in health, safety and the environment and anticipate that customers and their delegates will assist us in achieving these objectives.
15. Delegates must wear full-length trousers and closed leather shoes or safety boots (no trainers) during the course. Delegates who do not wear appropriate clothing and footwear will not be able to take a full part in practical sessions.
16. Marked tools and equipment shall be issued and checked with delegates at the start of the course. Delegates may be charged for tools and equipment not returned.
17. Copyrights on licensed material provided by DMC remain with DMC. Copyrights on third party licensed materials remain with identified third parties. Licensed materials include but are not limited to all course documentation, manuals and instructions in electronic or printed form. The Customer/Delegate shall not copy, make accessible or distribute licensed material to third parties without DMC's prior written consent.
18. The Customer/Delegate acknowledges and agrees that a breach of copyright cannot be compensated adequately by an award of damages or indemnity or other pecuniary remedy and DMC shall be entitled in the event of any such breach to the remedies of injunction specific performance or other equitable relief to redress any such breach.
19. DMC will treat any information about delegates and/or any internal business information of the Customer/Delegate as confidential.
20. The validity, construction and performance of these conditions shall be governed by the Laws of England.
